PROFESSIONAL EXPERIENCE

Frontend Engineer – Freexit Technologies(Part Time) [Lagos]

Feb. 2023 - Current

- Spearheaded the frontend development team in architecting and implementing a cutting-edge logistics software platform.
- Leveraged Nextjs to create a highly responsive and user-friendly interface for our logistics service, ensuring an exceptional user experience.
- Implemented robust security measures to safeguard customer data and financial transactions, ensuring the safety and trust of our users.
- Led efforts to enhance the platform's scalability, performance, and reliability to meet the demands of a growing user base.
- Fostered a culture of innovation, encouraging team members to explore and implement new technologies and features that enhance the service.

Lead Frontend Engineer – Prexscribe(Part Time) [Abuja]

Jul. 2022 - Current

- Made recommendations for new technology integration based on suitability and alignment to business goals, resulting to 35% increase in efficiency.
- Designed and optimized responsive user interfaces, enabling seamless access to critical patient data and clinical decision support on various devices.
- Collaborated with backend developers to establish efficient data communication and integration, enabling real-time access to patient records and clinical insights.
- Teamed up to implement user-centric design strategy, translating UX and business requirements into coded solutions, improving overall user satisfaction by 20%.
- Implemented stringent security measures to ensure compliance with healthcare data regulations, safeguarding patient information and privacy.

Software Developer – Bluetag Technologies(Full Time) [Enugu]

Jul. 2022 - Nov. 2022

- Updated old code bases to modern development standards, improving functionality by 20%.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Integrated constructive programs into cohesive product.
- Designed intuitive graphical user interfaces to improve user experience.
- Integrated software components into fully functional software system.

Frontend Developer – Kellispay (Contract) [Lagos]

Jan. 2022 - Jun. 2022

- Planned and developed interfaces that simplified overall management and ease usage.
- Optimized website and increased speed by 15%.
- Built and deployed scalable mobile responsive User Interfaces for maximized User experience.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.

Frontend Developer – Davayte(Contract) [Kazan]

Jan. 2019 - Dec. 2019

- Worked cooperatively with client services, sales and design team in deadline-driven environment.
- Designed and updated layouts to meet usability and performance requirements, increasing app speed by 10%.
- Coded using HTML, CSS and JavaScript to develop features for both mobile and desktop platforms.
- Improved tools to boost user interaction and deliver design versatility.

Software Developer – Nigerian Breweries PLC(IT) [Lagos]

April. 2018 - Sept. 2018

- Built and deployed scalable mobile responsive User Interfaces for maximized User experience.
- Assisted with search engine optimization (SEO) strategies and techniques.
- Maintained existing wordpress websites, ensuring their continued functionality and performance.
- Wrote well designed, testable and efficient code.

- Participated in code reviews to ensure best practices.

PROJECTS

- **Project Name:** School Motive.

Description: Developed a comprehensive school management system to enhance personalized learning experiences, streamline administrative tasks, and improve communication between educators, students, and parents. Utilized cutting-edge technologies to create an intuitive and user-friendly platform for the digital age.

Technologies: React, Typescript, Tanstack query, Chakra UI.

Link: <https://dev.schoolmotive.com>

- **Project Name:** MezGPT.

Description: Created MezGPT, an AI tool revolutionizing open-source project data management. MezGPT optimizes data handling for collaborative software development, enhancing efficiency and effectiveness across industries.

Technologies: NextJS, Typescript, Wagmi, RainbowKit.

Link: [MezGPT](#)

- **Project Name:** Nogabi.

Description: Nogabi is a software development agency that offers robust, secure, and scalable solutions, from collaborative ideation and product strategy to engineering, testing, and continuous scaling.

Technologies: React, Typescript, Framer motion.

Link: <https://nogabi-solutions.com>

EDUCATION

- Enugu State University of Science and Technology, Enugu.
Bachelor Of Science in Computer Science

Sept. 2015 – Oct. 2019

CERTIFICATIONS

- Meta: Advanced React

Dec. 2022
